LEARNING DEVELOPMENT PROJECT OVERVIEW FORM

Project title	WebCT in Law			Project ID No	**CLAD – HIST056**
Strategy area/theme	Law				
Start date	February 2001	Completion date	November 2004		
Project type	Learner enhancement project				
Level	Undergraduate	Programme of study	All		
Aims	- By the end of the first stage of the project (September 2001) all undergraduate law students will have access to core materials for their current modules through their personal WebCT logon. - At the same time, the academic project staff will develop additional materials for two modules (one at Level 1 and one at level 3) that will include the features listed above in the 'Objectives' paragraph. - During later stages of the project the project staff will provide workshops and other support to encourage additional academic staff to develop module materials and otherwise make use of WebCT's facilities. The academic project staff will also continue the development of WebCT within their own modules.				
Objectives	The principal objective is to provide students with web-based materials in support of their programme of study. This will include ready access to - materials which would otherwise be available only in printed / photocopied form; - collections of existing web-based resources which are currently available from a range of websites; - a range of interactive web-based materials; - specially written material which would not be available elsewhere (including self-tests); and - web-based discussions in support of learning.
