

LEARNING DEVELOPMENT PROJECT OVERVIEW FORM

Project title	Development of technology enhanced learning in the School of Engineering		Project ID No	CLAD – HIST021
Strategy area/theme	Engineering			
Start date	September 2003	Completion date	July 2005	
Project type	Learner enhancement project			
Level	All	Programme of study	Various	
Aims	<ul style="list-style-type: none"> – To develop systems and procedures to support the effective use of learning technologies across the School of Engineering. – For the School of Engineering to work in collaboration with Schools of Mathematics and Statistics, and Chemical Sciences in the development of these systems and procedures within their Schools 			
Objectives	<ol style="list-style-type: none"> 1. To use learning technologies to enhance the learning experience of students 2. To develop staffs' skills in the use of learning technologies 3. To have appropriate staff structures in place to support the use of learning technologies 4. To collaborate in the development of learning technologies of learning and teaching 			
Overview	<p>This project developed systems and procedures to support the effective use of learning and learning-support technologies within the School of Engineering. It targeted a range of modules that will benefit from the development of such systems and procedures across all levels of the programmes, and also addressed the learning, teaching and assessment support infrastructure within the School. In addition, the project benefits in part from the involvement of the LTSO with the Schools of Mathematics and Chemistry in the development of similar systems and procedures. This feature of the project provides an excellent mechanism for dissemination of best practice.</p>
